Work Experience

Software Developer – Novbee

June 2023 – January 2024

Part-time Software Developer

August 2023 – January 2024

- Developed and maintained a website leveraging **React.js**, **Next.js**, **FastAPI**, **PostgreSQL**, and **GraphQL**.
- Conceived and executed the backend infrastructure and database schema for the company.

Software Developer Intern

June 2023 – August 2023

- Engineered a Singing Voice Synthesis model utilizing **PyTorch** in **Linux** environment.
- Wrote **Python/Selenium** automation scripts to facilitate data collection and processing.
- Developed a user-friendly **React** website enhancing the company's digital presence.

Digital Marketing and Data Analytics Intern – Homie Living

May 2022 – August 2022

- Enhanced the open and click rates of email campaigns by 22% and 17% respectively.
- Optimized SEO strategy leading to **top 3 Google search rankings** for various keywords (4 ranked first, 4 ranked second, 2 ranked third).
- Devised a marketing campaign reaching thousands of audience members, resulting in daily sales figures exceeding \$100K.

Individual Projects

MIDI Editor: A versatile and customizable MIDI editor library.

[Source Code](#)

- Developed a **React** library for creating and editing MIDI files with a highly interactive interface.
- Implemented a practical singing voice synthesizer in **Next.js** using this library as an illustration.
- Incorporated vital features such as **clipboard**, **undo/redo**, **import/export**, and **lyric input**.
- Designed to be responsive and **mobile-friendly**.

Hooks: A fully tested React hooks and TypeScript utilities library.

[Source Code](#)

- Designed a comprehensive collection of modular **React** hooks and **TypeScript** utilities.
- Ensured robustness and reliability through extensive testing with **Jest** and **React Testing Library**.
- Source code maintained for optimal performance and scalability.

Stay Hydrated: Interactive console-based application for water intake tracking.

[Source Code](#)

- Developed using **React** and **Ink** for a modern user interface, with **LokiJS** for managing data.
- Engineered to operate **in the background**, automatically tracking water consumption and delivering notification.

ICMS: A comprehensive course management dashboard.

[Source Code](#)

- Integrated a **facial recognition login component** for enhanced security.
- Delivers real-time course schedule and information depending on user's context and timing.
- Augmented interaction by enabling users to forward course-related information to their personal email accounts.
